Professional Summary

Dedicated and enthusiastic web developer with a strong foundation in PHP Programming and valuable experience in both back-end and front-end development. Passionate about leveraging cutting-edge web technologies to build dynamic and user-friendly websites and applications. Possesses a solid understanding of web development frameworks, database management, and responsive design principles.

Work Experiences

Freelance Full Stack Developer, 01/2025 - Now
Hikari - Melbourne, Australia
Project: Hikari Japanese Restaurant Website - hikaribuffet.com.au

- Be the main point of contact for gathering requirements, brainstorming ideas, and proposing solutions.
- Designed complete **UI/UX** using **Figma**, creating wireframes and interactive prototypes that aligned with the client's Japanese-inspired brand identity.
- Developed a restaurant website with custom CMS using **PHP/Laravel**, enabling independent content management and implemented a modular database architecture with interconnected models.
- Built responsive frontend using **HTML5**, **CSS3**, **Tailwind CSS** and **JavaScript** while reducing page load times by 40% through asset optimization and proper caching implementation.
- Successfully configured domain settings, **SSL** certificates and implemented seamless **CI/CD** pipelines using **GitHub Actions** for efficient and automated deployment.

Intern Web and Animation Developer, 07/2024 to 11/2024
YEME – Melbourne, Australia
Project: YEME website – yeme.com.au

- Created 10+ GIF animations with **Vyond** to make the website more engaging.
- Built an interactive prototype with **Protopie**, mapping 30+ user journey screens.
- Updated and maintained the website using **WordPress**, adding new features such as custom widgets, advanced theme customization, and SEO optimization.
- Developed several bespoke **WordPress plugins** to enhance functionality tailored to client needs.
- Designed explainer videos and animations to improve user understanding of services.
- Followed **Agile** development methodologies, participating in daily standups and sprint planning.

Full Stack Developer, 01/2022 to 06/2022
Tesla Vietnam – Hanoi, Vietnam
Project: Annie E-commerce Website - annies.com

- Worked on building and testing UI components using **HTML5**, **CSS3**, and **jQuery**.
- Fixed 30+ UI/UX bugs in the e-commerce platform, reducing user complaints by 45% within 2 months.
- Assisted in the development of a responsive front-end interface using **Bootstrap**, leading to a 25% increase in mobile traffic.
- Developed scalable back-end solutions using **PHP** and **WordPress**.
- Contributed to improving website performance by implementing caching and **CDN** solutions, reducing page load time by 35%.
- Supported the integration of 3 third-party payment gateways, enhancing user checkout experience.

Part Time PHP Developer, 06/2021 to 01/2022
Tesla Vietnam – Hanoi, Vietnam
Project: National ePrescription Management System - donthuocquocgia.vn
- Built back-end solutions with **PHP** and **Laravel**, and developed **10+ RESTful APIs** for seamless data exchange
- Migrated 50,000 medical records to **MongoDB** with 100% accuracy in a team of 6.
- Optimised queries, cutting data retrieval time from 1.5s to under 1s
- Participated in the front-end team to develop dynamic and responsive user interfaces using **Bootstrap** and **jQuery**.
- Supported deployment and provided technical guidance to stakeholders and end-users.

Intern Web Developer, 01/2021 to 06/2021
Tesla Vietnam – Hanoi, Vietnam
Project: Oceanshalo Website - oceanshalo.com
- Implemented responsive designs using **HTML5**, **CSS3**, and **Bootstrap** while contributing to dynamic content features with **jQuery** and back-end development with **PHP/MySQL**.
- Improved accessibility (70%→90%) with Figma & Bootstrap; optimised database for 30% faster response.
- Created and deployed **WordPress** plugins and resolved post-deployment issues reported by users within tight timeframes.
Project: Medical Community Network Company Website – medcomm.vn
- Designed responsive UI components using **Figma** and **Bootstrap**, improving website accessibility scores from 70% to 90%.
- Optimised **MySQL** database configurations, reducing server response times by 30% during peak traffic hours.
- Supported and resolved 15 post-deployment issues within a week

Education

Bachelor of Computer Science in Data Science, 08/2021 – 11/2024
Swinburne University of Technology - Melbourne, VIC
- Swinburne International Scholarship, 2020
- GPA: 3.5/4
